SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

PURPOSE:

To summarize the information set out in the attached nemorandum regarding the progress of the field in reducing the delinquency and backlog of security work during January 1953.

SYNOPSIS:

The January administrative reports from all offices reflect that the total pending active matters in the 65, 100 and 105 classifications decreased during the month from 24,770 to 24,098. The number of delinquent matters was reduced from to 24,098. Thirty-one offices reduced their total number 49.5% to 48.8%. Thirty-one offices reduced their of pending active matters and twenty-four offices reduced their of pending active matters and twenty-four offices reduced their delinquency in these classifications. Letters were sent to thirteen offices directing them to further reduce their backloy and delinquency in these matters.

The New York Office has approximately 30% of the pending active matters in the 65, 100 and 105 classifications pending active matters in the 65, 100 and 105 classifications in the entire field. That office has approximately 47% of the entire field. The average delinquency of 312 city the entire field. The average delinquency of 37% compared to New York's offices combined was approximately 37% compared to New York's delinquency of 76%.

ACTION

We will continue to closely follow the field in this matter. You will be advised of the results of the review of the February administrative reports.

FROM:

SUBJECT: DELINCUENCY IN SECURITY INVESTIGATIONS

PURPOSE:

To advise you of the progress which has been made in reducing the delinquency and backlog of work in the security

DETAILS:

As you know, since December 1951 we have been closely following, on a monthly basis, the twelve field offices having all offices. We have written letters to the twelve offices and to delinquency has not been satisfactory.

The following statistics reflect the status of pending and delinquency for all field divisions on the first of the year and the progress for the last four months:

CLASSIFICATIONS 65, 100 and 105

Total	15,667	18,542	18,018	, ,	•

The over-all statistics for the eleven offices other than the New York Office since March 31, 1952, are as follows:

Date	Pending Active Matters (65-100-105)	Delinquent Matters (65-100-105)	Percentage Delinquent (65-100-105)
3-31-52	15,144	10,347	68.3%
4-30-52	14,978	9,628	64.3%
5-31-52	14,246	9,008	63.2%
6-30-52	14,157	9,103	64.3%
7-31-52	13,117	7,965	60.7%
8-31-52	12,611	7,589	60.2%
9-30-52	11,367	5,732	50.4%
10-31-52	11,286	4,957	43.9%
11-30-52	11,148	4,844	43.5%
12-31-52	10,937	4,578	41.9%
1-31-53	10,730	4,696	43.8%

During January, nine of the twelve offices reduced the total number of pending active matters in the three classifications and seven reduced the delinquency in the total matters in those classifications.

- 3 -

.

1731

In regard to the New York Office you will note it has a high percentage of the pending active matters and delinquency in the twelve offices listed. During January the New York Office reduced the number of pending active matters in classifications 65, 100 and 105 by 317 matters and those delinquent by 476. New York's delinquency in the three classifications is approximately 76%.

Status of Security Work in the Remaining Forty Offices

The remaining forty offices are listed according to the percentage of delinquency on January 31, 1953, in total matters in classifications 65, 100 and 105. These statistics reflect the progress during January 1953. It should be noted that many of the smaller offices have no pending matters in classifications 65 and 105 and their entire pending backlog is in classification 100 matters.

	11-30-52		6,129	1,703	27.8%
	12-31-52		6,228	1,691	27.2%
•	1-31-53		6,080	1,554	25.6%

OBSERVATIONS:

- 1. During January 1953, the field reduced the total number of pending active matters in classifications 65, 100 and 105 by 672, from 24,770 to 24,098.
- 2. During January 1953, the total number of delinquent matters in the 65, 100 and 105 classifications was decreased by 495, from 12,267 to 11,772. The percentage of delinquency in these classifications decreased slightly from 49.5% to 48.8%.
- 2. The New York Office has approximately 30% of the pending active matters in the 65, 100 and 105 classifications in the entire field. That office has approximately 47% of the number of delinquent matters in these classifications in the entire field. The average delinquency of all other offices combined was approximately 37% compared to New York's delinquency of 76%.

ACTION:

As a result of the review of the January administrative reports letters have been directed to 13 offices instructing them to further reduce their backlog and delinquency in 65, 100 and 105 classifications.

We will continue to closely follow the field in this matter and will review the February administrative reports to determine the progress of the field. You will be advised of the results of that review.

(N) OBECURITY INDEX - KEY FACILITIES. - ADJUSTMENT TO 1953 KEY FACILITIES LEGT -- Inadmuch as the geographical reference numbers appearing in the 1953 KFL are completely different from the item numbers in the 1952 KFL and other changes are reflected therein, it will be necessary for you to institute the following procedures to adjust your Security Index to the new list. This project must be started immediately.

Check of Security Index Subjects Against 1953 KFL and Submission of Forus FD-122 to the Bureau.

- 1. All of your Security Index subjects must be checked against the 1953 KFL to determine if they are now employed in a Key Facility. This check shall not be restricted to the subjects now reflected in your Security Index as being employed in Key Facilities but will include all Security Index subjects.
 - 2. In every instance where a Security Index subject is found to be employed in a facility appearing in the 1950 KPL you will submit Form FD-122 reflecting the proper information as indicated in the 1953 KFL in accordance with the following instructions.

If the Security Index subject is found to be employed in a Key Facility the FD-122 will reflect (1) the geographical reference number for the facility as reflected in the left column of the KPL, (2) the abbreviation for the agency having security responsibility as reflected in the column headed "RESP" and (3) the abbreviations of all of the agencies having an interest in the key Facility. The

interested agencies will appear on the FD-122 to assure proper dissemination in the field and at the Bureau. They will not appear on the Security Index Cards returned from the Bureau.

For example, if the geographical reference number is 14870, the security responsibility is with the Navy (N) and the interested agencies are shown as Navy, Army (A) and Air Force (AF), the data "Geo; Ref. #14870; Resp. N; Interested Agencies, N, A, AF" should be set forth on the FD-122.

It will be noted that the Key Facilities located in the states covered by several Buroau offices bear geographical reference numbers which are loss than 10,000. In these instances the actual number is preceded by one, two, or three zeros. When setting forth the geographical reference number for such facilities, you are to use the actual number rather than that shown in the KFL. This is desired to simplify procedures at the Bureau in coding the data on the IBM machine. For example, if the geographical reference number appearing in the KFL is 00320, the security responsibility is with the Army and interested agencies are shown as the Army and the Research and Development Board (RDS), the data "Geo. Ref. #320; Resp. A; Interested Agencies A, RDS" should be set forth on the FD-122.

The alphabetical reference number should not be used by you under any circumstances.

It will be noted that in many instances an asterisk appears behind the abbreviation for the agency having security responsibility. As noted in the "Foreword" attached to the MFL, an asterisk indicates such assignment of responsibility is made without infringement on the Atomic Energy Commission's statutory responsibility. When it is determined that a Security Index subject is employed in such a facility the Form FD-122 recording such employment should bear the geographical reference number and the abbreviation for the agency having security responsibility followed by the letters AEC to reflect that the AEC is involved in the security responsibility. This should be followed by the identities of the interested agencies. For example, if the geographical reference number is 08690, the security responsibility is shown as A* and the interested agencies are A, RDB, and AEC, the data "Geo. Ref. #8690; Resp. A, AEC; Interested Agencies A, RDB, AEC" should be set forth on the

2/3/53 SAC LETTER NO. 53-12 The Bureau is revising Form FD-122 to include the words "Geo. Ref. #," "Resp." and "Interested Agencies" thereon. These will be furnished to your office upon requisition when the present supply of Form VD-122 is exhausted. In the meantime it will be necessary to type these words on the Forms ND-122 now in your supply when including Key Facilities data thereon.

In any instance where a Security Index subject is employed in a Key Facility, his Security Index card—should be tabbed for Compab and Detcom in accordance with previous instructions. If the subject's Security Index card does not already reflect this tabbing it should be indicated on the FD-122 submitted by you at this time.

- 3. In every instance where a subject is now reflected as being employed in a Key Facility in accordance with the 1952 KFL and his place of employment does not now appear on the 1953 KFL, Form FD-122 should be submitted to the Euroau deleting the Key Facility employment status of the subject. If his removal from the Key Facility category requires that the Detcom and/or Comsab tabbing be deleted, such deletion should be indicated on the FD-122.
- # If there is any doubt as to whether a Security Index subject is actually now employed at a Key Facility listed in the 1953 KFL such employment should be verified either by a check of his case file or through a check of his place or employment.

Action To Be Taken In Cases Not Previously Designated As Key Facilities Cases

In those instances where a Security Index subject is found through this check to be employed in a key Facility but he has not previously been listed in the Security Index as a Key Facility employee the following steps should be taken:

- 1. The residence address should be currently verified.
- 2. The Armed Services representative at the Key Facility or other reliable source should be contacted to determine whether the subject has access to classified or restricted material.
- 3. A report should be submitted at the earliest possible date bringing the case up to date, as well as including the information required for Key Facility reports. If the initial summary

2/3/53 BAC LETTER NO. 53-12 report in the case has not been submitted the report submitted at this time should be a summary report. Thereafter the case should be placed in a pending-inactive status and handled in accordance with existing instructions for key Facilities cases.

Dissemination and Content of Reports

Henceforth the following instructions for dissemination shall apply to all Key Facilities cases. The office of origin shall disseminate copies of each report to the proper local representatives of the intelligence agencies of the Army (G-2), Navy (ONI), Air Force (OSI), or the Coast Guard in any instance where one or more of these agencies are reflected in the KFL as being the agencies interested in the Key Facility. In all instances where one of these agencies has security responsibility for the Key Facility that agency shall be furnished a copy of each report.

Reports on subjects employed in Key Facilities for which the Marine Corps has security responsibility or in which the Marine Corps has an interest should be disseminated to the proper local representative of ONI.

Dissemination to the Atomic Energy Commission (AEC) Armed Forces Special Weapons (SWP), the Research and Levelopment Board (RDB) and the Maritime Administration (MA) shall not be made in the field. Any direct dissemination to these agencies will be made at the Bureau.

Inasmuch as the 1953 KFL contains numerous changes, it is possible that in some cases past dissemination has not been made to the agencies which now have security responsibility or are now interested agencies. The case file of each Security Index subject found to be employed in a facility appearing in the 1953 KFL must be reviewed to determine whether proper dissemination has been made of information appearing in his file in accordance with the 1953 KFL. Where proper dissemination has not been made in the past it should be made at this time.

To facilitate proper supervision of Key Facilities cases in the field and at the Bureau and to assure proper Missemination, the administrative page of each report hereafter submitted on a subject employed in a Key Facility shall contain a statement identifying (1) the name of the Federal Agency having security responsibility.

2/3/53 SAC LETTER NO. 53-12 for the Key Facility and (2) all of the interested agencies. The latter is a change of previous instructions to assure proper dissemination of all reports.

Instructions regarding the dissemination and content of reports concerning subjects of individual security investigations who are employed in Key Facilities shall apply to all such subjects whether they are or are not in the Security Index.

Handling Future Amendments To The 1953 KFL

As stated above, the Department of Defense will from time to time issue corrected pages to the KFL. At any time in the future that you receive amended pages to the KFL from the Bureau you should take the following steps to adjust your Security Index to the KFL.

- l. If the amended pages reflect the addition of Key Facilities the place of employment of all subjects in your Security Index must be checked against those facilities to determine if any subjects are employed therein. If so, the steps outlined above regarding the submission of Form FD-122, submission of a current report, dissemination of reports and future handling of such cases shall be followed.
- 2. If the amended pages reflect the deletion of Key Facilities in your territory, the Security Index cards of all Key Facility subjects must be checked against those facilities to determine if any such subjects are employed therein. If so, Form FD-122 should be submitted to the Bureau deleting the Key Facility designation for such subjects. If the Detcom and/or Comsab tabbing should be deleted, such deletion should be shown on the FD-122 submitted by you.

Advice to Dureau of Completion of Project

This project must be completed in all offices by March 1, 1953. You are to advise the Burcau on or before that date under the caption "Security Index - Key Facilities; Adjustment to 1953 KFL" that all Forms FD-122 necessitated by these instructions have been submitted to the Bureau. In the future all changes, additions, or deletions in the Security Index affected by the Key Facilities Program will be handled in accondance with the above instructions.

Appropriate changes in Section 87C of the Manual of Instructions are being prepared and will be forwarded to you.

SECURITY INDEX - PREPARATION OF SULMARY REPORTS

SYNOPSIS:

The field has submitted 3,769 summary reports in Non-Key Figure and Non-Key Facility Security Index cases. This is 24.9% of such cases in which summary reports are scheduled for preparation. Nine offices having comparatively few Security Index cases have completed the project. Breakdown of status of project in each office attached hereto.

ACTION:

None. Submitted for your information.

The next quarterly status letters will reflect the status of the project as of April 1, 1953. You will be advised of the status of the project at that time.

letter in connection with the project of preparing summary reports reflecting the progress made in submission of these reports. These status letters include statistics on all security Index subjects who are not employed in Key Facilities or are not Key Figures. Summary reports on Key Facility employees were to be submitted at the time that the regularly scheduled six-month reports were due in each case. Summaries on Key Figures are being deferred until after summaries are prepared on all other Security Index subjects.

The following tabulation reflects the status of this project as of the dates indicated. The differences in the figures appearing in the left hand column are due to changes in categories of cases in the Security Index because of deletions of Key Figures or the subjects become no longer associated with Key Facilities.

	Number of Summaries Scheduled in Non-Key Facility and Non-Key Figure Cases	Number of Summaries Submitted	Percentage Completed	
April 1, 1952	14,606	1,196	8.2%	
July 1, 1952	14,643	2,071	14%	
Oct. 1, 1952	15,073 .	3,133	20.8%	
Jan. 1, 1953	15,167	3,769	24.9%	

As of April 1, 1952, four offices reported the project as completed. As of July 1, 1952, six offices had completed the project and as of October 1, 1952 and January 1, 1953, nine offices reported completion. These are offices having a comparatively small number of Security Index subjects.

As you know a moratorium was declared on the project until January 1, 1953, by SAC Letter Number 85 (H) dated September 3, 1952, to permit reduction of the backlog and delinquency in security. work. This moratorium was partially lifted by SAC Letter Number 105 (A) dated October 14, 1952, which instructed those offices having personnel available to the project to reinstitute it immediately. At the present time offices are proceeding with the project as personnel becomes available within each office.

Attached for your information is a breakdown of the status of the project in each office as of January 1, 1953.

Office Memorandum • United STATE GOVERNMENT

TO

DATE: February 27, 1953

FROM !

SUBJECT: DEPARTMENT APPROVAL OF ---

Attorney General dated February 17, 1953, we asked the Department to furnish more complete identifying data for each Security Index case approved, the information to be submitted by separate memorandum or enclosures for each case.

On February 26, 1953, Department Attorney Bennett Willio, Jr., who is in charge of the attorneys reviewing the cases, telephonically advised me that one more list of approved names was being forwarded to the Bureau in one memorandum as in the past but that future approvals will be submitted by a cover memorandum listing each name approved to which will be attached a separate page for each case, the page to contain the complete identifying data requested. He stated that the Department agreed with the Bureau's supposition regarding more complete identifying data and that he will have no difficulty in the future in furnishing separate sheets for each approval as they will be prepared as carbon copies of records they are maintaining on the project. The one list he is sending over under the old procedure had been prepared as the reviews were completed and the preparation of a separate memorandum for each case would require duplication of work.

ACTION:

None. This is for your information.

UNITED STATES GOVERNMENT Office Memorandum

DATE: February 27, 1953

TO

FROM !

SUBJECT: SECURITY INDEX - ()

PURPOSE:

To advise you of the total cards in the Security

Index.

During the past week 80 new cards were added to the Security Index and 17 cards were cancelled, a new increase of 63 cards.

The Security Index count as of today is 20,557.

Office Memorandum . United States Government

TO

DATE: February 20, 1953

FROM

SUBJECT: SECURITY-INDEX - KEY FACILITIES
REVISION OF FORM FD-122

PURPOSE:

To have Form FD-122 revised to include proper Key Facility data thereon in accordance with SAC Letter Number 53-12 (N) dated February 3, 1953.

BACKGROUND:

The new 1953 Key Facilities List was transmitted to the field by SAC Letter Number 53-12 (N).

This letter contained instructions regarding adjustment of the Security Index to the 1953 Key Facilities List. Changes in the Key Facilities List have necessitated a change in the data that the field is required to submit to the Bureau on Form FD-122 in cases where subjects of Secrety Index cards are employed in Key Facilities.

The field has been advised that Form FD-122 is being revised and that the new form will be furnished to the field when the present supply has been exhausted.

The attached revised Form FD-122 substitutes the words "Key Facility Data: GEOGRAPHICAL REFERENCE NUMBER, RESPONSIBILITY" and "INTERESTED AGENCIES" for the words "NATURE OF INDUSTRY OR BUSINESS (Specify from Vital Facility List)" which now appear on Form FD-122.

ACTION:

The attached revised Form FD-122 should be transmitted to the Training and Inspection Division to be printed when the present supply of this Form is exhausted.

SUBJECT:

ŧ

1

- SECURITY INDEX

The Security Index at Los Angeles now contains approximately 3,200 cards. The residence and employment reflected on these cards is re-determined semi-annually. This re-determination, plus the regular checks for new aliases, changes in DETCCM and/or COMSAB status and the like causes the submission of 300 FD-122's per month for changes on the Security Index Cards.

On receipt of the new, changed Security Index Cards from the Bureau, the photograph and description on the old Security Index Cards are transferred to the new cards. The photograph transfer is simply effected by restapling. Transfer, however, of a complete description, such as is contained on an FD-186, requires approximately five minutes' typing for each card. The Los Angeles office, therefore, would spend 6.25 days per month for one clerk on the transfer of such maximum descriptions. This effort could be cut fifty percent by the adoption of the following suggestion:

- An unexecuted description in the style and order of an FD-186 could be printed on the 5 x 8 cards at the Bureau prior to the IBM operation on their face. The advantages would be:

- 1. A standard description form (comparable to the FD-186) would be on the back of each Security Index Card, insuring a description of the maximum quality. Use of the present stamp authorized for the back of the photograph does not give complete descriptive information.
- 2. A time-consuming typing job (the left column of the description) would be reduced to an efficient printing step. This would eliminate fifty percent of the typing done on the Security Index Card and for the Los Angeles Division would amount to a saving in clerical time of seventy-five working days annually and a saving of about \$1,000.00. Throughout the field, a saving of thirty cents per Security Index Card per year should be effected.

SUBJECT: SECURITY FLASH NOTICES.

Asuggestion:

That we reduce the amount of typing involved in preparing transcripts of records in connection with Security Flash Notices. The method presently followed was outlined in a memorandum addressed to ou by the writer dated December 30, 1952, with the suggestion that the work involved be analyzed by the Domestic Intelligence Division to determine what data could be eliminated. This inquiry was acknowledged in a memorandum from Mr. Baumgardner to Mr. Belmont, dated January 12, 1953, and in accordance with the recommendation of the Domestic Intelligence Division the following suggestions are submitted.

1. That the Identification Division, in response to a request for a Security Flash Notice, no longer furnish the Field or the Domestic Intelligence Division a description or occupations, in connection with positive identifications.

2. That after the Field or Domestic Intelligence Division once have been furnished the information contained in a fingerprint jacket in which a Security Flash Notice has been posted when a current inquiry or fingerprint card is received the Field or the Domestic Intelligence Division be furnished only the information re the current inquiry of arrest and not a recapitulation of the information previously furnished at the time the Security Flash Notice was requested.

ADVANTAGES:

This will reduce typing, reading, duplicating, and assembly time, particulary in preparing the supplemental copy.

ETSADVANTAGES:

Apparently none.

SAVINGS:

There will be a saving of personnel time on each case handled which will release this personnel time for handling other duties, and compensate even mough to a small degree for some of the personnel shortage in the unit where these transcripts are prepared.

DATE: 2/17/53

FROM : EXECUTIVES CONFERENCE

SUBJECT: DESCRIPTION ON REVERSE SIDE OF SECURITY INDEX CARDS

Present at the Executives Conference 2/16/53 were

The Conference unanimously recommended favorably as to the suggestion of Special Agent Office, that when Security Index cards are next printed there be placed on the reverse side along the left-hand margin printed words, beside which descriptive data may be entered by the appropriate field office.

The descriptive data will include name, sex, race, birth date, height, weight, build, hair, eyes, complexion, scars and marks, peculiarities, marital sidius, relatives, nationality, birth place, fingerprint classification, and FBI, PD and Selective . Service numbers. ...

There are enough Security Index cards on hand now to last a year. About 66,000 are used per year. They are printed commercially at a cost of \$3.00 per thousand, plus a flat charge of \$50 per order. The printed data on the reverse will raise the cost an additional \$50 per order and the fee will still be \$3.00 per thousand.

The savings will be approximately \$1600 per year in clerical time saved. The Los Angeles Office has estimated savings of three clerk days per month.

At the present time Security Index cards are prepared .. by the Statistical Section on long strips of about 1,000 each and then the strips are torn apart at the perforations and appropriate cards forwarded to the field offices where descriptive data is typed on the back of each card. The change will reduce the amount of typing necessary in the field.

The Conference unanimously approved. Attached is a letter to Special Agent

ST INDARD FORM NO. 64

DATE: March 4, 1953

FROM

subject: SUGGESTED MODIFICATION OF FORM FD-154 (Verification of Information on Security Index Card)

There is attached a suggested modification of Form Fd-154 which is believed would add uniformity and clarity to information obtained in the verification of a subject's residence and place of employment.

Form FD-154 lists residence first and then employment, whereas the security index cards and Form FD-122 list employment first and then residence. Since information as contained on a subject's security index card is set forth on FD-154 each time a recneck is to be made as to the present residence and employment of a subject, it is suggested that FD-154 conform with the security index card by listing employment first and then residence.

residence and employment, a notation being made as to the person making verification, the method of verification, and the date. The form which is now used does not separate the verification of residence from the verification of employment. It is believed such a separation would add clarity since, in a number of cases, the date and the method of verification as to residence is not the same as the date and the method of verification as to employment. In some cases, particularly those cases in which a subject resides in one state and is employed in another state, the Agent or person by whom verification is made is not the same.

Inspector

Adoption of this suggestion is recommended, to become effective when new Forms FD-154 are printed. No change of policy is involved and the suggested modification of the form will solve a minor problem in handling verifications of information on Security Index Cards.

SECURITY INFORMATION -

~ 200C

Office Memorundum • United States Government

DATE: March 13, 1953

FROM

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

PURPOSE:

To summarize the information set out in the attached memorandum regarding the progress of the field in reducing the delinquency and backlog of security work during February 1953.

SYNOPSIS:

The February administrative reports from all offices reflect that the total pending active matters in the 65, 100 and 105 classifications decreased during the month from 24,098 to 23,935. The number of delinquent matters was reduced from 48.8% to 46.9%. Twenty-two offices reduced their total number of pending active matters and twenty-seven offices reduced their delinquency in these classifications. Letters were sent to 12 offices directing them to further reduce their backlog and aelinquency in these matters.

The New York Office has approximately 30% of the pending active matters in the 65, 100 and 105 classifications in the entire field. That office has approximately 48% of the number of delinquent matters in these classifications in the entire field. The average delinquency of all other offices combined was approximately 35% compared to New York's delinquency of 75%.

ACTION:

We will continue to closely follow the field in this matter.

You will be advised of the results of the review of the March
administrative reports.

DETAILS:

As you know, since December 1951 we have been closely following, on a monthly basis, the twelve field offices having a large proportion of our pending security work and since March 1952 all offices. We have written letters to the twelve offices and to other offices where progress in reducing the backlog of work and delinquency has not been satisfactory.

The following statistics reflect the status of pending work including both pending active and pending inactive matters and delinquency for all field divisions on the first of the year and the progress for the last four months:

TOTAL PENDING MATTERS CLASSIFICATIONS 65, 100 and 105 ALL FIELD DIVISIONS

				•	

The over-all statistics for the eleven offices other than the New York Office since March 31, 1952, are

as follows:	Pending Active Matters (65-100-105	Delinquent Matters (65-100-105)	Percentage Delinquent (65-100-105)
Date 3-31-52 4-30-52 5-31-52 6-30-52 7-31-52 8-31-52 10-31-52 11-30-52 12-31-53 2-28-53	15,144	10,347	68.3%
	14,978	9,628	64.3%
	14,246	9,008	63.2%
	14,157	9,103	64.3%
	13,117	7,965	60.7%
	12,611	7,589	60.2%
	11,367	5,732	50.4%
	11,286	4,957	43.9%
	11,148	4,844	43.5%
	10,937	4,578	41.9%
	10,730	4,696	43.8%
	10,721	4,358	40.6%

reduced the total number of pending active muties in the three classifications and eight reduced the delinquency in the total matters in those classifications.

In regard to the New York Office you will note it has a high percentage of the pending active matters and delinquency in the tielve offices listed. During February the New York Office reduced the number of pending active matters in classifications 65, 100 and 105 by 177 active matters in classifications 65, 100 and 105 by 177 matters and those delinquent by 162. New York's matters and those delinquent by 162. New York's delinquency in the three classifications is approximately 75%.

Status of Security Work in the Remaining Forty Offices

O

 \mathcal{C}

The remaining forty offices are listed according to the percentage of delinquency on February 28, 1953, in total matters in classifications 65, 100 and 105. These statistics reflect the progress during February 1953. It should be noted that many of the smaller offices have no pending matters in classifications 65 and 105 and their no pending backlog is in classification 100 matters.

Luring February, sixteen offices were able to reduce their pending active work load and nineteen offices reduced their delinquency. The following figures illustrate the progress of the forty offices as a whole since March 31, 1952, as reflected in the administrative

pate	Pending Active Latters (65-100-105)	Delinquent Natiers (65-100-105)	Percentage Delinguent
3-31-52	9,421	5,011	53.2%
4-30-52	9,138	4, -355	47.7%
5-31-52	8,724	3,990	45.7%
6-30-52 .	8,417	3,842	45.6%
7-31-52	7,776	3,156	40.6%
8-31-52	6,928	3,054	44.0%
9-30-52	6 , 198	2,109	34.0%
10-31-52	6,126	1,279	20.8%
11-30-52	6,129	1,703	27.8%
12-31-52	6,228	1,691	27.2%
1-31-53	6, 080	1,554	25.6%
2-28-53	6,103	1,515	24.8%

OBSERVATIONS:

- During February 1953, the field reduced the total pending active matters in classifications 65, 100 and 105 by 163, from 24,098 to 23,935.
- During February 1953, the total number of delinquent matters in the 65, 100 and 105 classifications was decreased by 489, from 11,772 to 11,233. The percentage of delinquency in these classifications decreased slightly from 48.8% to 46.9%.

1445

The New York Office has approximately 30% of the pending active matters in the 65, 100 and 105 classifications in the entire field. Of the 11,233 delinquent matters in these classifications in the entire field, 5,360 or approximately 48% are in the New York Office. The average delinquency for all offices other than New York is approximately 35% while New York's delinquency is 75%.

USECURITY INDEX

There is attached hereto for each office an alphabetical list of Security Index subjects prepared from the Bureau's Security Index as of April 15, 1953. Each subject is identified by name, race, sex and date of birth. The subjects carried in the various subdivisions of the Special Section are listed on separate pages under the appropriate headings. It is requested that this list be used to reconcile the Security Index in your office with the Index at the Seat of Government by checking the names on the list against your Security Index cards.

In checking this list against your Security
Thier the following items should be considered and handled

- l. If the name of a subject on the attached list is not included in your Security Index, you should check that subject's case file to determine his correct that subject's case file to determine his correct security Index status. An appropriate notation should be placed adjacent to the subject's name on the enclosed list reflecting the correct Security Index enclosed list reflecting the correct security Index status for the subject. If his name should be deleted status for the subject. If his name should be deleted from the Bureau's Security Index the notation should refer to the previous communication from your office which recommended cancellation. If you do not have a which recommended cancellation. If you do not have a security Index card for the subject and a card should security Index, the notation should request the Bureau to forward cards to your office.
- 2. If this check discloses the names of subjects in your Security Index which do not appear on the attached list, the names of such subjects and the Bureau file number (where known) should be set forth on a separate sheet of paper with the date that the subject was recommended for inclusion in the Security subject was recommended for inclusion in the Index and were not included for inclusion in the Index and were not included for inclusion in the Index and were not included therein at the time of printing of the attached list therein at the time of printing of the attached list but cards have subsequently been prepared at the Bureau. Instances of this nature may also occur in those cases Instances of this nature may also occur in those cases where cancellation of a Security Index card has where cancellation of a Security Index card has recently been recommended by you and you have not yet received Bureau authorization to cancel.
- 3. In checking the Special Section of your Security
 Index against the attached list you should be certain
 that the subjects are in the same subdivisions as those
 indicated on the attached list. Appropriate notations
 should be placed on the attached list if there are any
 discrepancies between your Special Section and the list.
- 4. To avoid an increasing number of discrepancies between the attached list and your Security Index due to current changes being made in the Security Index, this check must be instituted immediately and completed within 10 days of the receipt of this memorandum by each office. Upon completion, the attached list and appropriate notations should be returned to the Bureau by cover memorandum under instant caption.

April 23, 1953

SUGGESTION #179-53 C SECURITY INDEX-(SCIECTED) / PREPARATION OF REPORTS

SYNOPSIS:

This Suggestion proposes that the Burson propose a printed form to be issued to the field which will constitute administrative pages containing the headings for the items of documentation which are to be placed thereunder at the time security reports on individuals are typed. The Security Section recognizes that this will save considerable stenographic time and recommends that this Euglestian be adopted. Attached is sample form to be used if adopted.

ACTION:

This memorandum should be returned to

1404

STA HOARD FORM NO. 64

Office Memorandum • united states government

TO

. DATE: April 15, 1953

FROM

SUBJECT: SECURITY INLEX-REQUEST FOR RUBBER STAMPS

Approvals of Security Index cases by the Department are now received in a memorandum to which are attached separate sheets of paper for each case approved. After processing the individual sheets are placed in the respective case file for the subject. Each sheet merely identifies a subject, the approval appears in the memorandum.

In order to identify each enclosure and to key it to the incoming memorandum from the Department it is recommended that a rubber stamp be used to empedite the handling of these matters. It is requested that two rubber stamps be made up and furnished to

The stamps to contain the information set forth below using approximately the same letter size as appears therein:

BUREAU ADDENDUM:
Enclosure to memorandum dated
, from the AAG in Charge
of the Criminal Division approving
the name of captioned individual
for inclusion in the Security Index.
Approval appears in

Because of the confidential nature of the entire Security Index Program it is recommended that the stamps not be made by a commercial concern outside of the Eureau. but be prepared by the Laboratory Division.

ACTION:

If you approve, this memorandum should be routed to the Laboratory Division in order that two stamps as described above can be prepared.

DETAILS &

The attached Suggestion has been referred to us for our views. Under current instructions when the field prepares security reports in which it is necessary to document the information contained therein such data is set forth on administrative pages in columnar form under the headings: Identity of Source, Date of Activity, and/or Description of Information, Date Received and Agent to Whom Furnished.

The Suggestion proposes that administrative pages be prepared as a Burcau form on Mineograph and thin-white paper to save repetitious typing of these headings each time an administrative page is prepared for a report.

The Security Section views this Suggestion favorably. It is recognized that if adopted and made available to the field upon requisition as a standard FD form considerable field stenographic time will be saved. I therefore recommend that this form be adopted. If adopted it should be set up in the manner exhibited in the attached sample.

PERSONAL ATTENTION SYND LY CONFIDENTIAL UNITED STATES DEPARTMENT OF JUSTICE SAC LETTER NO. 53-30

FEDERAL BUREAU OF INVESTIGATION

May 1, 1953

WASHINGTON 25, D. C.

RE: SECURITY INDEX - UNAVAILABLE SECTION

Missing Subjects

There are included in the Security Index several subjects whose whereabouts is unknown. These subjects have ostensibly divested themselves of any contact with their previously known associates and places of residence and employment either to engage in underground subversive activity or deliberately to avoid detection by representatives of the Federal Government. The Security Index cards of such missing subjects are now maintained either in the Geographical or Special Sections of your Security Index. Henceforth, the cards of such subjects will be placed in the Unavailable Section of your Security Index in accordance with the instructions set forth below.

Security Index Subjects Who Are Out Of The Country

Heretofore, we have cancelled Security Index cards of subjects who are citizens of the United States when it has been learned that they have departed from the United States for an extended period of time. So long as such individuals retain their United States citizenship they can be expected to return to this country at some time in the future. In fact, in the event of world-wide hostilities resulting in an actual state of war involving the United States such

citizens of the United States would probably be required to return to this country. Under such conditions those subjects returning to this country who were included in the Security Index at the time of their departure from the United States would, in many instances, constitute a threat to the internal security at the time of their arrival. In view of this the Sécurity Index cards of United States citizens will henseforth not be cancelled upon their departure from the United States regardless of the intended length of their stay abroad.

Henceforth, no Security Index card will be cancelled by reason of the subject's having departed from this country unless that subject is an alien who has permanently departed either voluntarily or as a result of deportation proceedings. In such instances the Security Index cards will be cancelled only after the subject's departure has been verified as being permanent. If a United States citizen who is included in the Security Index and has been out of the country is found to have renounced his citizenship and taken citizenship of a foreign country his Security Index card may be cancelled only after it has been determined that he does not intend to return to the United States.

At the present time there are included in the Security Index numerous subjects who are outside the United States. Their cards are maintained in either the Geographical or Special Sections of the Security Index. Henceforth, their Security Index cards will be maintained in the Unavailable Section in accordance with the instructions set forth below.

Security Index Subjects Who Are Imprisoned

Heretofore, when a Security Index subject has been imprisoned for a relatively short period of time his Security Index card has been retained. If the period of confinement was for an extensive period of time you have been authorized to destroy the Security Index card without prior Bureau authority. In either case you have been required to advise the Bureau by memorandum of the details concerning the imprisonment of the subject and that arrangements have been made to be notified of the subject's release. Upon receipt of information reflecting the release of a subject who was included in the Security Index at the time of his confinement, you have been required to advise the Bureau immediately by memorandum of the release

5/1/53 SAC LETTER NO. 53-30 and of your recommendation as to whether the subject should be continued in the Security Index-or-a-now Security Index-card should be prepared for the subject.

Henceforth, no Security Index card will be cancelled by reason of a subject's having been imprisoned regardless of the langth of time he will be incarcerated. Security Index cards of such subjects will be maintained in the Unavailable Section in accordance with the instructions set forth below.

Unavailable Section of the Security Index

Subjects who are missing, who are out of the country or are imprisoned at the time of an emergency would be unavailable for apprehension. In order that such subjects may be readily identified and no time will be wasted in handling their cases in the event of an emergency, each office is to set up and maintain an Unavailable Section in its Security Index in accordance with the following instructions.

- 1. The Unavailable Section will be maintained separate from but in conjunction with the Geographical and Special Sections of the Security Index behind a tab marked "Unavailable Section." This Section will be broken down into three subsections headed by tabs and marked, "Missing," "Out of the Country," and "Imprisoned." The Security Index cards of subjects falling in any one of these categories will be filed alphabetically by the name of each subject behind the card designating the category of such subjects.
- 2. All Security Index cards now in the Geographical and Special Sections of your Security Index must be checked to determine the identities of subjects whose whereaccuts is unknown, who are out of the country or who are imprisoned. Form FD-122 will be submitted on each subject. Each such Form FD-122 will have the words "Unavailable Section" typed in the upper right portion thereof.

If the subject is missing the word "Missing" will be typed in the space provided on the Form FD-122 behind the line marked "MISCELLANGUS (Specify)." A cover memorandum will be submitted with each Form FD-122

5/1/53 SAC LETTER NO. 53-30

_ 3 .

- 4. Upon receipt of the Forms FD-122 at the Bureau new Security Index cards will be prepared. Two cards for each subject will be sent to your office. Each card of a missing subject will bear the code letters "MI" in the upper right-hand corner. Each card of a subject who is out of the country will bear the code letters "OC" in the upper right-hand corner. Each card of a subject who is imprisoned will bear the code letters "PR" in the upper right-hand corner.
- 5. Upon receipt of the two cards in the field they must be checked for accuracy and the necessary data, field office file number, description and photograph (if available) will be placed on one of the cards. This card will then be filed in the Unavailable Section alphabetically behind the "Missing," "Out of the Country," or "Imprisched" subdivisions. The other card will be filed in the Alphabetical Section of the Security Index. The old Geographical or Special Section card and the old Alphabetical card will be destroyed.
- 6. It is not desired that Security Index subjects be included in the Unavailable Section as missing immediately upon determination that they are no longer located at their previously known places of residence or employment. It will be necessary for Agents to whom such cases are assigned to first ascertain any logical leads as to the subject's whereabouts and, if such leads are determined, to conduct the necessary investigation to locate the subjects. If it becomes obvious that the subject can actually be classified as a missing subject by reason of information developed indicating that he has deliberately absented himself from his previous environment and contacts to avoid detection by us, has gone into hiding, or is working clandestinely in an underground capacity, that subject should then be included in the Unavailable Section of the Security Index as a missing subject. At the time the Form FD-122 is submitted to the Bureau placing the subject in the Unavailable. Section a cover memorandum must be submitted advising of the investigative steps already taken to locate him.

5/1/53 SAC LETTER NO. 53-30 You have previously been instructed that the cases of missing Security Index subjects are to be retained in a pending status and are to be given preferential and continuous investigative attention. Every conceivable means must be utilized to locate such subjects in the least possible time. Investigations of missing subjects must be handled as thoroughly and promotly as any fugitive investigation. Close supervision of such cases must be maintained in the field at all times.

Henceforth, the Bureau must be advised each 45 days of the investigative steps which have been taken during the period to locate a subject who is designated as missing. It is not desired that investigative reports be submitted which merely set forth negative results of investigation conducted to locate a subject. Such data should be properly included in memoranda to the Eureau. The Bureau will closely follow your investigative action to locate missing security index subjects.

- 7. The case of any Security Index subject who is out of the country must be followed at Reast each six months for verification of the subject's address, the same as any other Security Index case, to determine if the subject has returned to this country.
- 8. When a Security Index subject is imprisoned it will be necessary to make arrangements with the confining institution to be informed of the subject's release in accordance with past instructions. An administrative tickler should be set up for a date shortly prior to the expected date of the subject's release to assure that you are informed of the subject's release. Upon receipt of advice of the release of the subject you should ascertain whether the subject should be continued in the Security Index. If so, Form FD-122 should be submitted per instructions set forth below.
 - 9. In the future, if a subject who has been

5/1/53 SAC LETTER NO. 53-30

- 6.-

submitted on a missing subject advising in detail of the steps that have been taken by your office to locate the subject. Thereafter, the case will be handled in accordance with instructions set forth under 5 below. It is not desired that a subject be listed as missing when the only action taken to locate him has been merely a determination that he is no longer located at his previously known residence or place of employment.

If the subject is out of the country the words "Out of the Country" will be typed in the space provided on the Form FD-122 behind the line marked "Miscellaneous (Specify)." If the foreign address is known this should be placed on the FD-122 in the space provided for the residence address. If the subject is only known to be in a certain foreign country and his residence there is not known or is only known to be traveling abroad this information should be very briefly included on the FD-122. If the subject's current employment abroad is known this should be included on the FD-122.

If the subject is in prison the word "Imprisoned" will be typed in the space provided on the Form FD-122 behind the line marked "MISCELLANEOUS (Specify)." The identity of the institution in which the subject is incarcerated will be typed in the space provided for the residence address. The space for the business address will be left blank.

It is not desired that places of former residence or former employment be included on Sccurity Index cards of subjects who are missing, who are out of the country or who are imprisoned inasmuch as such data serves no useful purpose on the card.

3. The action required under 1 and 2 above must be instituted immediately and completed as soon as possible. You are to advise the Bureau under the caption "Security Index - Unavailable Section" when you have completed the submission of Forms FD-122 on all of your Security Index subjects who should be included in the Unavailable Section at this time.

5/1/53 SAC LETTER NO. 53-30

- 4 -

missing is located in your office territory or a subject who has been out of the country has returned to your territory or an imprisoned subject has been released, Form FD-122 must be submitted reflecting the subject's current residence and place of employment. The words "Remove From Unavailable Section" should be typed in the space provided behind the words "MISCELLANECUS (Specify)" which are on the Form FD-122. If the subject's card is to be placed in the Special Section the statement "Place in Special Section - Espionage (or Foreign Government Employee, etc.)" should be added in this space. When the new cards are received from the Bureau they should be checked for accuracy and the file number, description and photograph (if available) should be placed on one of the two cards. This card should then be filed in the Geographical or Special Section (where applicable) and the other card should then be filed in the Alphabetical Section of your Security Index. The old cards in the Unavailable and Alphabetical Sections should be destroyed.

10. In the future, if a subject who has been included in the Unavailable Section is located in another division, Form FD-128 should be submitted to the Bureau and the new office of origin with the pertinent data placed thereon including his current residence and business addresses. The notation "Remove From Unavailable Section" should be typed in the space to the right of the addresses. New Security Index cards will then be submitted to the new office of origin.

11. In the future, when a subject who is included in the Geographical or Special Sections of the Security Index is determined to be missing, out of the country or imprisoned, Form FD-122 will be submitted in accordance with instructions set forth under 2 above and the Security Index cards will thereafter be handled as set forth under 3 through 8 above.

5/1/53 SAC LETTER NO. 53-30

i.

Recommendation of Subjects for the Security Index Who Are Missing or Are Cut of the Country,

Missing Subjects

It may semetimes be found that a subject of a pending security investigation who has not as yet been included in the Security Index has disappeared and efforts to locate him have met with negative results. That subject may have been found to be potentially dangerous even though his current whereabouts is not known and he is suitable for inclusion in the Security Index at that time. In such an instance the only factor which would preclude him from inclusion in the Security Index is that his location is not known. In the past such subjects have not been recommended for the Security Index until they have been located.

Henceforth, such a subject should be recommended for inclusion in the Unavailable Section of the Security Index at the time it is found that he fits the standards for inclusion regardless of the fact that his location is not known. At that time Form FD-122 should be submitted to the Burcau with the word "Missing" appearing in the appropriate space. The Bureau should be advised at that time of the action taken to locate the subject. Security Index cards will be prepared and returned for appropriate filing in the Unavailable Section.

These instructions are issued to provide for appropriate early inclusion of persons in the Security Index who are dangerous to the internal Security and who may be acting in an underground capacity but whose whereabouts is not known. The fact that such persons have been included in the Security Index must not be interpreted as license for casual handling of their cases thereafter. Such cases must be given continuous vigorous attention until the subject is located in accordance with previous instructions.

Of course, the determination as to whether a subject is actually missing must be judged by the extent and results of previous investigations to

5/1/53 SAC LETTER NO. 53-30

- 8 -

5-1-53

determine his whereabouts. If location of a subject merely involves the pursuit of leads already developed and there is a definite indication of the subject's location, recommendation for inclusion in the Security Index may be withheld until his location is verified.

If you have any pending cases in your office in which the subjects should be recommended for inclusion in the Security Index and the only factor precluding inclusion at this time is the fact that they are missing, you should recommend their inclusion in the Unavailable Section of your Security Index upon receipt of these instructions.

Subjects Departing From The United States

In some instances a security investigation of a subject not yet included in the Security Index may be in progress at the time that it is found that the subject has recently departed for a fereign country. If the evidence developed at that time warrants the inclusion of the subject in the Security Index were it not for the fact that he is outside the United States, Form FD-122 should be submitted recommending his inclusion in the Unavailable Section of the Security Index. The words "Cut of the Country" should be typed in the space provided in the FD-122 and if his foreign address and employment is known it should be included in the FD-122. After all initial investigation is completed the subjects of a similar status who are included in the Unavailable Section as out of the country.

Of course, if the subject is an alien who has been deported or has otherwise permanently departed from the United States he should not be included in the Security Index in keeping with instructions set forth above.

These instructions regarding individuals who are out of the country apply to subjects of security investigations in the San Juan, Honolulu and

5/1/53 SAC LETTER NO. 53-30

- 9

Anchorage Offices as well as to the continental offices of the Bureau.

Changes in Section 870 of the Manual of Instructions necessitated by the above instructions are being prepared and will be forwarded to you in the near future.

Very truly yours,

John Edgar Hoover

SECURITY INDEX - UNAVAILABLE SECTION

CONFII

Re SAC Let #53-30.

The Norfelk Office has set up an unavailable section within the Security Index card file in accordance with re SAC let.

Rorfolk does not have any SI cards maintained in the Special Section. A review of the Geographical Section reflects that none of the SI subjects of the Norfolk Office should be included in the Unavailable Section at this time.

Office Memorandum • United States Government

TC

J

DATE: April 21, 1953

FROM

SUBJECT: SECURITY THOEX - UNAVAILABLE SECTION

SYNOPSIS:

Section be set up in the Security Index for subjects who are missing, are out of the country or are imprisoned.
This section will be broken down into three categories; namely, "Missing," "Out of the Country," and "Imprisoned."
The Security Index cards of subjects coming within these categories will be filed in their respective categories. If approved, provision has been made with the Statistical Section to code the Security Index cards of such subjects in order that they may be readily identified through use of the International Business Machine. The Alphabetical Section of the Security Index maintained in the Internal Security Section at the Bureau will not be broken down and will continue to contain the cards of all Security Index subjects in alphabetical order.

In order that we will have an established procedure for maintaining control of cases of subjects who are potentially dangerous to the internal security irrespective of their present whereabouts, it is recommended: (1) that we require the field to advise the Pureau of the action taken to locate missing Security Index subjects at the time their cards are placed in the Unavailable Section and each 45 days thereafter; (2) that we not cancel the Security Index cards (of subjects who depart from the country for an extended provide of time and who are expected to return; (3) that we not cancel the Security Index cards of subjects who are imprisoned for an extended period of time, and (4) that we include in " a Security Index those persons who are missing or are out of the country at the time they are found to fit the standards for the Security Index rather than withhold their inclusion until they are located or return to this country and that the cards for all such subjects be included in the Unavailable Bection recommended above.

ACTION:

If you agree, there is attached hereto a proposed SAC Letter containing detailed instructions with regard to setting up the Unavailable Section in accordance with the proposals set forth herein.

Appropriate manual changes will be prepared upon approval of the instructions set forth in the attached proposed SAC Letter.

ESTABLISHMENT OF UNAVAILABLE SECTION

Missing Security Index Subjects

At the present time the Security Index cards of all subjects are retained in either the Geographical or Special Sections of the Security Index. The cards of those subjects which are retained in the Geographical Section are arranged geographically in accordance with the subjects' places of residence. At the present time we have Security Index cards of subjects both in the Geographical and Special Sections whose whereabouts is unknown.

The San Francisco Office has suggested that Security Index cards for subjects whose whereabouts is unknown be placed in an "Unavailable Section." The reasons given by San Francisco for this procedure are (1) Security Index cards for all subjects whose whereabouts is unknown will be in one place and will assist in the investigation of the Communist Underground; (2) periodic checks can be made in each office to assure that the cases of such subjects are not closed and are being properly followed and (3) maintenance of all of the cards of such subjects geographically according to their last known residence (which is our present procedure) when their actual present residence is unknown is of no value in an emergency.

In elaboration of (3) above, it is observed that Security Index subjects who may be missing at the time action is taken to apprehend persons included in the Security Index would be unavailable for apprehension. It is planned that the Geographical Section cards will be pulled at the time of an emergency and assigned to Agents for apprehension of the respective subjects. If the subjects are missing such assignment to Agents would be a waste of time. It is advisable to maintain the cards of missing subjects in a separate section to avoid this unnecessary assignment for apprehension.

In addition, under our present procedure we have no means of determining in the field or at the Bureau the identities of the Sccurity Index subjects who are missing other than to check each Security Index card

individually. If adopted, the Unavailable Section would provide an expeditious means of determining this information. Under current instructions when a Security information is missing his case is given continuous. Index subject is missing his case is given continuous investigative attention until he is located. By segregating the cards of missing subjects the administrative procedure for identifying such subjects would be simplified.

Current instructions require the field to retain the cases of missing Security Index subjects in a pending status and to give them active, continuous investigative attention. Inasmuch as missing subjects must be located as soon as possible, it is imperative that their cases as soon as possible, it is imperative that their cases be closely supervised. To facilitate this supervision the attached proposed SAC Letter instructs the field to submit attached proposed SAC Letter instructs the field to submit a cover memorandum to the Bureau at the time that the Form FD-122 is submitted placing a missing subject in the Unavailable Section, advising of the steps taken to locate Unavailable Section, advising of the steps taken to locate him. The field is also being required to advise the Bureau each 45 days of the investigation conducted during each period to locate such subjects.

Security Index Subjects Who Are Out Of The Country

It should also be noted that numerous subjects are now included in the Security Index who are temporarily out of the country. Their Security Index cards are not cancelled upon learning of their departure from this country because they are expected to return in a relatively short time. Each six months the field checks to determine if they have returned. If any such subjects happen to be outside the United States at the time of an emergency they, as well as missing subjects, would be unavailable for apprehension thus, as with missing subjects, retention of their cards in the Geographical Section serves no useful purpose in the event it becomes necessary to apprehend persons included in the Security Index. As with missing subjects we have no means of determining from the Security Index in the field or at the Bureau which subjects are outside the United States without checking each Security Index card individually.

In the past we have cancelled the cards of Security Index subjects who have left the country for an extended period of time irrespective of their citizenship status. This probedure is believed undesirable because unless the subject is an alien who has permanently departed

from this country, either voluntarily or by reason of deportation, he can reasonably be expected to return to the United States at the time we become engaged in open warfare with another major power. At that time such persons as were suitable for the Security Index ct the time they departed from this country would certainly be potential security threats upon their return and would warrant active investigative attention if not actually . being apprehended at that time. It is my opinion that such subjects should be retained in the Security Index at the time they depart from the United States and their whereabouts verified each six months to be certain that we are aware of their return to this country. Of course, in those instances where we have a definite indication that a subject will not return to this country retention in the Security Index is not warranted.

Imprisoned Security Index Subjects

At the present time when a Security Index subject is imprisoned for an extensive period of time the card is cancelled and a stop is to be placed by the field with the confining institution to be notified of his release.

cards of imprisoned subjects and that the field be instructed that at the time it is learned that subjects are incarcerated, Forms FD-122 be submitted placing their cards in the Unavailable Section. This procedure will assure the inclusion of all such subjects in the Security Index on a continuing basis and will afford a guide to potentially dangerous subversives who, although temporarily unavailable for apprehension, will at some future dat@ again be available for apprehension. It is further proposed that in addition to placing stops against the subjects we instruct the field to set up an administrative tickler for a date shortly prior to the expected date of release of an imprisoned subject to further assure that we are aware of his release.

RECOMMENDING MISSING SUBJECTS AND SUBJECTS WHO ARE OUT OF THE COUNTRY FOR LABOURD IN THE SECURITY INDEX

We have been, under current procedures, withholding recommendation of Security Index cards on subjects who are missing until they have been located. This sometimes results in a considerable labse of time between the date of determination that they should be included in the Security Index and the

date that they are actually included therein.

Also, under current procedures, if a subject of a security investigation not yet included in the Jeografy Index is found to be out of the country that subject to not alread to the Scourity Index and hid cane is closed after all investigation is completed. This individual may be considered as potentially dangerous as others who are included in the Security Index and were it not for the fact that he is outside our jurisdiction he would be included in the Index. Under our present procedure of closing a case without including the subject in the Security Index we run the chance of that subject returning to this country without our knowledge and without proper provision for checking his whereaboute on a continuing basis. It is my opinion that missing subjects and subjects who are found to be out of the country and who are not included in the Security Index should be included therein at the time that they are found through investigation to be dangenous to the internal security. Such subjects should not be cacluded from continuing coverage merely because they are temporarily unavailable for apprehension. By adoption of the Unavailable Section and inclusion of subjects therein the are missing or out of the country our decurity Index couclage will be more complete and practical.

TANDARD FORM NO. 64

Office Memorandrian • United States Government

TO

DATE: May 8, 1953

PROM !

subject: SECURITY INDEX -PREPARATION OF SUBJARY REPORTS

SYNOPSIS:

The field has submitted 5,222 summary reports in Non-Key Figure and Non-Key Facility Security Index cases. This is 34% of such cases in which summary reports are scheduled for preparation. Fifteen offices having comparatively few Security Index cases have completed the project. Breakdown of status of project in each office attached hereto.

ACTION:

None. Submitted for your information.

The next quarterly status letters will reflect the status of the project as of July 1, 1953. You will be advised of the status of the project at that time.

DETAILS:

Each office is required to submit a quarterly status letter in connection with the project of preparing summary reports reflecting the progress made in submission of these reports. These status letters include statistics on all Security Index subjects who are not employed in Key Facilities or are not Key Figures. Summary reports on Key Facility employees were to be submitted at the time that the regularly scheduled six-month reports were due in each case. Summaries on Key Figures are being deferred until after summaries are prepared on all other Security Index subjects.

The following tabulation reflects the status of this project as of the dates indicated. The differences in the figures appearing in the left hand column are due to changes in categories of cases in the Security Index because of deletions of Key Figures or the subjects become no longer associated with Key Facilities as well as other variations in the content of the Security Index.

	Number of Summaries Scheduled in Non-Key Facility and Non-Key Figure Cases	Number of Summaries Submitted	Percentage Completed
April 1, 1952	14,606	1,196	8.2%
July 1, 1952	14,643	2,071	14%
October 1, 1952	15,073	3 , 133	20.8%
January 1, 1953	15,167	3, 769	24.9%
April 1, 1953	15,328	5,222	34%

As of April 1, 1952, four offices reported the project as completed. As of July 1, 1952, six offices had completed the project and as of October 1, 1952 and January 1, 1953, nine offices reported completion. Fifteen offices reported the project completed as April 1, 1953. These are offices having comparatively small number of Security Index subjects.

As you know a moratorium was declared on the project until January 1, 1953, by SAC Letter Number 85 (N) dated September 3, 1952, to permit reduction of the backlog and delinquency in security work. This moratorium was partially lifted by SAC Letter Number 106 (A) dated October 14, 1952, which instructed those offices having personnel available to the project to reinstitute it immediately. At the present time offices are proceeding with the project as personnel becomes available within each office.

Attached for your information is a breakdown of the status of the project in each office as of April 1, 1953.

SUCCESTION (225-53 Concenity inter - preparation of exports

The attacked su postion which has been referred to us for our views recommends that the heading "Innediate Relatives" be added to the established form for security reports on individuals.

rection 50, Item 28, of the manual of Instructions specifies that immediate relatives of a subject is an iven which should be included under the physical description for the subject. It should be noted that the necessity for ascertaining the identities of relatives of subjects of security investigations is specifically covered under items (f) and (h) on the established and 24c of Section 870 of the famual of Instructions.

Although the suggested heading would point up to Agents the recessity of obtaining and setting forth in security reports the identifies of relatives of the subjects, it is our recommendation that we consorm to the established hureau procedure of including such mate in reports under the heading of Thissical Isseriptions and that section 870 which pertains to security investigations of individuals not be changed as a result of this suggestion.

SUBJECT:

SECURITY INDEX - PREPARATION OF REPORTS

Present at the Executives Conference May 28, 1953, were Messrs.

Special Agent , Baltimore, suggested that the rules for writing security reports by changed so that the relatives of the subject will appear in that section of the report entitled "Background" rather that in the section of the report containing the physical description of the subject.

The standard rule is that the names and whereabouts of relatives be shown as a part of the physical description of the subject. The suggesting employee felt that requiring such information under "Background" would result in more complete information being obtained and the location as to the identity of relatives would appear in a more convenient part of the report.

The Domestic Intelligence Division was opposed, as was the entire Executives Conference. If you agree, no further act need be taken insmuch as the suggesting employee has already been thanked for his idea.

Office Memorandum . United States Government

TO : 12.

DATE: 1'cy 14, 1058

FROM 1 11P.

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

Separate To

PURPOSE:

To advise you of the progress which has been made in reducing the delinquency and backlog of work in the security field.

ACTION:

As a result of the April administrative reports letters have been directed to 16 offices instructing them to further reduce their backlog and delinquency in 65, 100 and 105 classifications.

We will continue to closely follow the field in this matter and will review the May administrative reports to determine the process of the field. You will be advised of the results of this review.

RECORDED - 51 1/2 1953

Winds

King

De Bufile E 10 injuly

DETAILS:

As you know, since December 1951 we have been closely following, on a monthly basis, the twelve field offices having a large proportion of our pending security work and since harch 1952 all offices. We have written letters to the twelve offices and to other offices where progress in reducing the backlog of work and delinquency has not been satisfactory.

The following statistics reflect the status of pending work including both pending active and pending inactive matters and delinquency for all field divisions as of December 31, 1951, and the progress for the last four months:

TOTAL PENDING MATTERS CLASSIFICATIONS 65, 100 and 105 ALL FIELD DIVISIONS

reduced the total number of pending active matters in the three classifications and eleven reduced the delinquency in the total matters in those classifications.

In regard to the New York Office you will note it has the highest number of the pending active matters and the highest percentage of delinquency of the twelve offices listed. During April the New York Office reduced the number of pending active matters in classifications 65, 100 and 105 by 203 from 7,028 to 6,825 matters and those delinquent by 510 from 5,329 to 4,819. New York's delinquency in the three classifications was reduced from approximately 76% to approximately 71%.

Status of Security Work in the Remaining Forty Offices

The remaining forty offices are listed according to the percentage of delinquency on April 30, 1953, in total matters in classifications 65, 100 and 105. These statistics reflect the progress during April 1953. It should be noted that many of the smaller offices have no pending matters in classifications 65 and 105 and their entire pending backlog is in classification 100 matters.

reduce their pending active work load and sixteen offices reduced their delinquency.

The following figures illustrated the progress of the forty offices as a whole since April 20, 1953, as reflected in the administrative reports:

Date	Pending Active Matters (65-100-105)	Delinquent Matters (65-100-105)	Percentage Delinguent
3-31-52	9,421	5,011	53.2%
4-3 0-52	9,138	4,355	47.77
5-31-52	8,724	3, 990	45.7%
6-30-52	8,417	3,842	45.6%
7-31-52	7.776	3,156	40.6%
8-31-52	6,928	3,054	44.0%
9-30-52	6,198	2,109	34.0%
10-31-52	6,126	1,279	20.8%
11-30-52	6,129	1,703	27.8%
12-31-52	6,228	1,691	27.2%
1-31-53	6,080	1,554	25. 6%
Q-28-53	6,103	1,515	24.8%
3-31-53	5, 936	1,542	26.0%
4-30-53	5,864	1,414	24.1%

OBSERVATIONS:

1. During April 1953, the field reduced the total pending active matters in the 65, 100 and 105 classifications by 933, from 23,033 to 22,100.

- 6 --

- - The New York Office has 6,825 pending active matters in the 65, 100 and 105 classifications which is approximately 31,0 of such matters in the entire field. Of the 9,120 delinquent matters in these classifications in the entire field, 4,819 or approximately 53% are in the New York Office. The average delinquency for all offices other than New York was reduced from approximately 34% to approximately 28% during April. New York reduced its delinquency from approximately 76% to approximately 71%.
 - 4. Letters have been directed to 16 offices instructing them to further concentrate on reducing their backlog and delinquency in the 65, 100 and 105 classifications.

This is for your information.

UNITED STATES GOVERNMENT

DATE: June 11, 1953

PROM

DELINQUENCY IN SECURITY INVESTIGATIONS

Status of investigations in 65, 100 and 105 classifications as of May 31, 1953, set forth. Number of pending active matters in the entire field reduced from 22,100 to 21,740. The delinquent matters in the entire field increased from 9,120 to 9,730 increasing.

the delinquency from 41.3% to 44.8%. Letters sent to 28 offices instructing them to reduce their backlog and delinquency. delinquency.

New York reduced its pending active matters in the three classifications from 6,825 to 6,566 and the number delinquent from 4,819 to 4,557 or from approximately 715 to approximately 69%. New York accounts for approximately 30% of the pending active matters and 47% of the delinquency in these classifications in the entire field. New York reduced the number of pending active matters in the 100 classification from 5,867 to 5,652. The number delinquent was reduced from 4,417 to 4,214 remaining at an approximate 75% delinquency.

We will continue to closely follow the field in this matter. You will be advised of the results of the review of the June administrative reports.

JUN 23 195a

DETAILS:

, C

. **C**S

As you know, since December 1951 we have been closely following, on a monthly basis, the twelve field offices having a large proportion of our penaing security work and since March 1952 all offices. We have written letters to the twelve offices and to other offices where progress in reducing the backlog of work and delinquency has not been satisfactory.

The May administrative reports from all offices reflect that the total pending active matters in the 00, 100 and 105 classifications decreased during the month from 22,100 to 21,740. The number of delinquent matters increased from 9,120 to 9,730, an increase from 41.3% to 44.8%. Thirty-Vitwo offices reduced their total number of pending active matters and eighteen offices reduced their delinquency in these classifications. Letters were sent to 28 office directing them to further reduce their backlog and delinquency in these matters.

The New York Office has approximately 30% of the pending active matters in the 65, 100 and 105 classifications in the entire field. That office has approximately 47% of the number of delinquent matters in these classifications in the entire field. The average delinquency of all other offices combined increased during the month from approximately 28% to approximately 34%. New York's delinquency decreased from 71% to 69%.

The bulk of New York's backlog and delinquency is in the 100 classification. During May the number of pending active matters in the 100 classification in the New York Office was reduced from 5,867 to 5,652. The number of such matters which were delinquent was reduced from 4,417 to 4,214. The Idelinquency remained at approximately 75%.

Under date of May 8, 1953, New York advised that. as of May 1, 1953, 39 Agents were transferred from the Security Matter Section to the Loyalty Section to work United Nations - Loyalty cases. Subsequently they advised by individual memoranda that the Security Matter cases to which these Agents had been assigned would be reassigned. By letter of June 2, 1953, the status of 100 classification matters in the New York Office compared to the status of their other investigations was brought to the attention of the SAC. The serious situation which faces New York because of their high backlog and delinquency in the 100 classification was pointed out to the SAC. He was informed that the procedure of transferring Agents from security cases to other types of investigations could no longer be condoned by the Bureau and that henceforth when New York has promised action in a security case by a specified date in response to an inquiry by the Bureau and such action is not taken by the time promised, a letter of explanation will be requested. He was instructed to make sufficient personne? from within the office available to this phase of his investigative activities to effect an immediate drastic reduction in his backlog and delinquency and to place his office in a position to resume preparation oi summary reports at the earliest possible date.

The following statistics reflect the status of pending work including both pending active and pending inactive matters and delinquency for all field divisions as of December 31, 1951, and the progress for the last four months:

		•		

During May, only seven of the twelve offices reduced the total number of pending active matters in the three classifications and only four reduced the delinquency in the total matters in those classifications.

In regard to the New York Office you will note it has the highest number of the pending active matters and the highest percentage of delinquency of the twelve offices listed. During May the New York Office reduced the number of pending active matters in classifications 65, 100 and 105 by 259 from 6,825 to 6,566 matters and those delinquent by 262 from 4,819 to 4,557. New York's delinquency in the three classifications was reduced from approximately 71% to approximately 69%.

Status of Security fork in the Remaining Forty Offices

The remaining forty offices are listed according to the percentage of delinquency on May 31, 1053, in total matters in classifications 65. 100 and 105. These statistics reflect the progress during May 1953. It should be noted that many of the smaller offices have no pending matters in classifications 65 and 105 and their entire pending backlog is in classification 100 matters.

FROM

SUBJECT: - DELINGUENCY IN GEGURITY INVESTIGATIONS

SYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in Espionage, Internal Security, Security Matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of May 31, 1953, is set forth herein. Number of pending active matters in the entire field reduced from 22,100 to 21,740. The delinquent matters in the entire field increased from 9,120 to 9,730 increasing the delinquency from 41.3% to 44.8%. Letters sent to 28 offices instructing them to reduce their backlog and delinquency.

New York reduced its pending active matters in the lines classifications from 6,825 to 6,566 and the number delinquent from 4,819 to 4,557 or from approximately 71% to approximately 69%. New York accounts for approximately 30% of the pending active matters and 47% of the delinquency in these classifications in the entire field. New York reduced the number of pending active matters in the 100 classification from 5,867 to 5,652. The number delinquent was reduced from 4,417 to 4,214 remaining at an approximate 75% delinq ency.

ACTION:

We will continue to closely follow the field in this matter. You will be advised of the results of the review of the June administrative reports.
